

WEBLINKBOX™

ANY TIME, ANY PLACE, ACCESS
TO THE CONTROL COMPUTERS
IN THE HOUSE

- **All control computers in the palm of your hand**
- **Any place in the world**
- **No additional software needed**

TOP CONDITIONS THROUGH COMPLETE CONTROL

ANY TIME, ANY PLACE, ACCESS TO THE CONTROL COMPUTERS IN THE HOUSE

Modern communication technology, the world in the palm of your hand. An indispensable instrument that also benefits the agricultural sector. It is physically impossible to be in the animal houses the whole day long. But, farmers want to track how their animals are performing. Fancom ensures total access to the control computers on your farm is possible from any location.

Features

- The Weblinkbox literally links process control in the house and the PC or the user's PDA, if required using a remote connection.
- The Weblinkbox is a simple and universal solution that can make a reliable connection under any conditions.
- Using it is simplicity itself. Once a connection has been made, the familiar operating panel of the control computer appears on the display of the PC or PDA. All the latest measurement and control data from the control computers can be readout and even adjusted where necessary. It just couldn't be easier.

Advantages

- With a wireless PC or PDA users have direct access to the control computers.
- No additional software needed.
- A connection can also be made via Internet - no matter the distance. In fact, from wherever you are in the world - all you need is an Internet connection.
- Also when using public computers, access to your control computers is possible.
